“This [is] an excellent book that is currently the most comprehensive single work on chorea and which is of great value to all who work in the field of movement disorders.”

—Roger A. Barker, MD, Department of Neurology and Cambridge Centre for Brain Repair, Cambridge, UK

“*The Differential Diagnosis of Chorea* is an important milestone in neurology and movement disorders. The text represents a new degree of sophistication for neurologists and movement disorders specialists when an entire book related to the differential diagnosis of chorea is published…The book will be of value to neurologists, psychiatrists and residents in neurology and psychiatry as both a practical guide to the treatment of chorea and a review of the diseases and syndromes in which chorea occurs.”

—William J. Weiner, MD, Professor and Chairman, University of Maryland School of Medicine, Department of Neurology, Director, Maryland Parkinson’s Disease and Movement Disorders Center, Baltimore, MD

### The Differential Diagnosis of Chorea

Edited by Ruth H. Walker, MB, ChB, PhD

The involuntary movement disorder known as chorea can be due to a wide variety of neurological conditions, both genetic and acquired. This volume provides a comprehensive account of these conditions. While Huntington’s disease is the prototypic inherited chorea, with the development of the genetic test for this disorder it has become apparent that a small but significant proportion of patients with this phenotype do not have this diagnosis. It is vital to correctly diagnose these patients with chorea. With advances in molecular medicine, it is now easier to identify new genetic causes of chorea and expand the phenotype of disorders not typically thought to cause this movement disorder. Non-genetic etiologies are also discussed, including medications, structural lesions, psychogenic causes, and metabolic abnormalities.

This book describes in detail the latest clinical and etiological information regarding the causes of chorea. Psychopathology, management, and pathophysiology of chorea are also addressed.

Many chapters are contributed by authors working at the forefront of research in the specific disorders, and provide the latest basic and clinical research, some from their own laboratories.

### A MAJOR PUBLICATION ON MOVEMENT DISORDERS

- First single-volume publication to capture current progress and excitement in this dynamic research field.
- Unique collection of detailed reviews on all aspects of chorea research written by leading neuroscientists and neurologists

2011 | 458 pages | 978-0-19-539351-4 | $79.95 / $59.95
Chapter 1: Introduction: An Approach to the Patient with Chorea - Ruth H. Walker

Chapter 2: Functional Anatomy of Chorea - Jonathan W. Mink

Chapter 3: Huntington Disease - Rebecca M. Gilbert and Steven Frucht

Chapter 4: Benign Hereditary Chorea - Octavian R. Adam and Joseph Jankovic

Chapter 5: Huntington’s Disease-like 2 - Dobrila D. Rudnicki and Russell L. Margolis

Chapter 6: Chorea-akanthocytosis - Benedikt Bader, Adrian Danek, and Ruth H. Walker

Chapter 7: McLeod Syndrome - Hans H. Jung

Chapter 8: Neurodegeneration with Brain Iron Accumulation - Penelope Hogarth and Susan Hay

Chapter 9: Neuroferritinopathy - Alisdair McNeill and Patrick F. Chinnery

Chapter 10: Aceruloplasminemia - Frank Skidmore

Chapter 11: Chorea in prion diseases - Nayana Lahiri, Simon Mead, and Sarah J. Tabrizi

Chapter 12: Chorea in inherited ataxias - Guilherme G. Riccioppo Rodrigues and Jennifer G. Goldman

Chapter 13: Inherited Metabolic Diseases Causing Chorea in Childhood - Donald Gilbert

Chapter 14: Medication-induced Chorea - Marta San Luciano and Rachel Saunders-Pullman

Chapter 15: Metabolic Causes of Chorea - S. Elizabeth Zauber and Katie Kompoliti

Chapter 16: Structural Causes of Chorea - Nora L. Chan and Winona Tie

Chapter 17: Sydenham Chorea - Esther Cubo

Chapter 18: Paraneoplastic and other Autoimmune Choreas - Michael H. Pourfar

Chapter 19: Paroxysmal Chorea - Camilla Kilbane

Chapter 20: Psychiatric Aspects of the Neurodegenerative Choreas - Mark Walterfang, Andrew Evans, and Dennis Velakoulis

Chapter 21: Psychogenic Chorea - John C. Morgan, Shyamal H. Mehta, and Kapil D. Sethi

Chapter 22: Treatment of Chorea - Brandon Barton and Kathleen M. Shannon

Dear Librarian/Library acquisitions Committee:

I am a contributor to a major, multi-authored new book on movement disorders, and I recommend that the library purchase it for its collection.

Thank you for your consideration; I believe that The Differential Diagnosis of Chorea will greatly enhance our existing collection for the following reasons:

- Great relevance to my work/research/study, and that of my students and colleagues
- First single-volume publication to capture current progress and excitement in this dynamic research field.
- Unique collection of detailed reviews on all aspects of chorea research written by leading neuroscientists and neurologists
- The most comprehensive and up-to-date volume on chorea

Simple ways to help promote your title

To ensure that *The Differential Diagnosis of Chorea* receives the widest attention possible within the academic community, here are some ways in which you, as an Oxford contributor, will be able to support us in spreading the word amongst your colleagues and contacts.

**EMAIL / ONLINE**

- We’ve created a custom promotional PDF flyer for your title. You will be able to email this to your friends, family, colleagues, relevant organizations, online discussion forums and blogs, and distribute at appropriate meetings and conference.
- Include OUP’s online catalog link for your title, or a clickable thumbnail of the book jacket on your email signature (*jacket images available upon request*).

OUP recently published my work in *The Differential Diagnosis of Chorea*. For more information, visit:

- If your school has an intranet, we will supply you with the book blurb, jacket art, and order form for you to post.

**CONFERENCES**

- Are you planning to speak at any events or meetings in the near future? If so, let us know and we will provide the appropriate promotional materials.

**UNIVERSITY**

- Your university is a great resource to help you spread the word about your publication. If you provide us with the contact details for your press office or public relations department, we’ll be happy to discuss additional promotion possibilities with them.
- Does your university’s library currently carry your publication? If not, submit the enclosed library referral form to your librarian or library acquisitions committee.
- Does your alumni publication feature the published works of alums? If so, please provide us with the publication’s editorial contact information, and we will reach out to them.

**FRIENDS AND FAMILY**

- Would you like your friends, family, and colleagues to have an opportunity to purchase your publication at a special price? Send your contacts a copy of the enclosed flyer along with the following message (email or letter):

Hello friend,

Oxford University Press recently published my work in *The Differential Diagnosis of Chorea*. It is a comprehensive, timely, and beautifully illustrated reference, and I believe it will be a valuable addition to your collection.

Oxford has generously arranged to make *The Differential Diagnosis of Chorea* available to “friends and family” of the work at a special price for a limited time. Oxford offers you the opportunity to receive a discount if you purchase the work within the next twelve months.

Specifically, on an order placed by **October 5, 2011**, you will receive **25% off** the list price of **$79.95**! For more information or to take advantage of this exclusive discount, please visit [http://www.oup.com.us](http://www.oup.com.us) and type promotion code: **29286** in the top right corner of the screen.

All best regards,

Your name

P.S. Here is some information about the book:

*The Differential Diagnosis of Chorea*

2011 | 458 pages | 978-0-19-539351-4 | $59.95 through October 5, 2011; $79.95 thereafter
