

July, 2011

**\*\*\* NOTE: In no way does this document advocate rape or sexual abuse of any nature. Sexual violence in the form of painful anal sex should never be confused with forcing a woman against her will. The whole point of painful anal sex is for the woman to willingly submit to the man. \*\*\***

This essay is more than just a cosmetic alteration of the previous version with a few pictures added. It's actually a complete rewrite from scratch. Previously, the essay read more like a rant than a factual analysis and justification of painful and degrading sexual acts. This has been altered greatly in this new version.

Plus, there are a lot of nice pictures of sluts getting torn apart, and I know you like that sort of thing.

Why does anal sex have to hurt? Why must a butt fucking be both physically agonizing and emotionally humiliating for a woman? Read on.

Anal sex isn't about pain so much as it is about submission to male dominance. This is the aspect of the act that feminists hate the most. In my comparative sexuality courses in college, our (entirely female) lecturers would stand at their podiums and rant themselves hoarse about how anal is about subjugation.

They were, of course, absolutely correct.

That is the *point* of anal sex. If you read my other writings, you'll discover that my research over the last twenty years has led me to the inescapable conclusion that women are subject to men by genetic temperament as well as emotional training. For literally millions of years, mankind bred via rape or a near equivalent. 4200 years ago the first legal code was written that actually stated that rape was a punishable crime. Prior to that, it was known as "effective breeding."

If you think for even the briefest of moments about our history on this rock, you'll note that 4200 years is not even a statistical blip on the radar of human history. Lucy, *Australopithecus Afarensis*, is 3.1 *million* years old. Do the math.

Women were created evolutionarily to be subject to the males that protect them, provide for them and their offspring, and beget that offspring upon them. Up until just a few seconds ago, evolutionarily speaking, they understood their roles and duties and performed them.

Then, suddenly, women started forgetting their place, and weak men who should have been weeded from the genetic stream due to their lack of dominance (and would have been, only a few generations before) began to submit to *them*. As women began to gain political power, they forgot their place and began assuming the places traditionally and evolutionarily held by men—and doing a shit-poor job at it.

By the way, if you happen to be a Christian, nothing I've stated here invalidates your holy book or is invalidated by it. In your book, God commands the woman to obey her man in all things. The bedroom is a thing, last I checked. If you happen to be of most other religions, a similar yoke is placed on the female neck.

Don't think that men got off easy in the bargain, ladies! Men are still required by tradition to protect you, provide for you and shelter your offspring. Rosie O'Donnell, a prominent lesbian man-hater, has a personal protection team composed entirely of males.

Entirely. Of. Men. This shrilly vocal woman who claims men are unnecessary still needs them for some reason to feel safe in a dangerous world.

In fact, the only things that have changed in our genetic contract are *your* responsibilities. You're no longer required to obey, submit to, and please your man. In fact, he's required to not only protect you, but obey you, submit to you, and please you *in the hope that you might consider sending a little pleasure his way.*

I see no fairness in that, no love, and little joy. I see a burden and I reject it utterly.

Anal sex, *most* sexual acts in fact, should be painful, degrading, humiliating, or some combination of the three for a woman. The reason for that is quite simple:

When something pleases you, you are not submitting to it. You are not demonstrating to your man that his protection, shelter, and provision are worthwhile to you. You are not proving that, of the 110 million women in America of potential breeding age, he made the right choice in selecting *you* to be bound to for the rest of his life.

Think about it. Stereotypically, women love being eaten out. When the tongue touches your clitoris, are you *submitting* to it, or are you *enjoying* the sensation?

Spreading your legs for a man is not itself an act of submission despite the male superior position it generally means. Being penetrated is a submissive act, but it is entirely possible to submit to penetration in a dominant manner. Sad, defective, broken males spend a lot of money in Las Vegas to give women the power over them that allows a female to say, "Now put it in slow. That's it. Don't you dare cum!"

Whatever. Dictionary.com defines submit as *to give over or yield to the power or authority of another*, and *to subject to some kind of treatment or influence*. In what way does a woman's refusal to engage in anal sex if it hurts indicate *submission* under those definitions? In fact, it would appear that carefully lubricating your cock, easing it in slowly after stretching her gingerly with your fingers, and carefully making sure there is no pain, only pleasure— is in fact *submitting to her!*

July, 2011

This is not the way things are supposed to be. No matter how many times you vote for Hillary Clinton (because the world clearly respects a national leader that has sucked a cock), you are not going to change 3.1 million years of evolution with ninety years of political correctness.

The lack of female submission in modern sexual relationships is tearing those relationships apart. I'm not and never have been advocating that women be silent baby-makers who stay in the kitchen. In a marriage or other social relationship between partners—*partners*—a woman should have a voice and areas where she is expert.

Here's a recent example. A few weeks ago I received an email from a young slut who wanted to join my [Hammered Ass](#) Yahoo! message board. This girl is extremely submissive, highly intelligent, and quite young. She's also an expert programmer.

I have many talents. I can place four .45 rounds within two inches of one another at 25 feet. I can write books and have done so. I can run marathons and have done so. I can sing, quite well. I am no programmer. So if she and I were involved in a romantic relationship, she should automatically submit to me and let me write any software that needs to be written, right?

What the fuck? Of course not! Women aren't stupid, and they have talents, strengths, and skills far beyond those of their male counterparts in many, many areas.

*However*, if she ever enters my bedroom, she will do so as a supplicant, there to please me with every hole.

Male submission to females is ripping the fabric of American society apart because women have just assumed authority over *every* damn thing, whether they are good at it or not, and because they now have complete control over our sex lives, men pretty much meekly go along with whatever damn fool idiocy they want. That would be sexual extortion, by the way.

July, 2011

Nothing makes a feminist screech louder than the thought that her reproductive acts are not hers to control. The two topics they pound podiums the hardest over are rape and abortion. Oddly, while they claim that they don't need men any more than a "fish needs a bicycle," they also demand that men who rape women deserve worse punishment than men who rape men, or women who rape men, women, or children, which would seem to indicate that they *do* need men—at least to protect them from other men.

Despite these idiotic, snarling demands, feminists have never adequately addressed three prominent facts:

- Female sexual pleasure is immaterial to biological reproduction.

The evidence for this is conception via rape, and decades of bored housewives cranking out kids.

- Female sexual submission has been the norm for the entirety of mankind's existence.

The evidence for this is shown in the submissive structure of female reproduction in tribal societies not only in history and prehistory, but also today, in such tribes as the Masai and Bantu.

- Female reproduction has been under the control of men for equally as long.

July, 2011

The evidence for this is in the marriage customs of ancient and recent man. Brides came with dowries. Barren women were (and sometimes still are, in Middle Eastern countries) put to death. Marriages were arranged for daughters long after they were no longer arranged for sons in Europe.

These facts are irrefutable, and serve to explain that female pleasure and control over the act of sex is completely immaterial. Feminists have stolen male dominance and used it to vilify men as “abusers” and “rapists” when what we really are is “dominant” and “in need of reward from the holes of our women for the things we provide them.”

I’ve never met a feminist who knew anything at all about evolutionary biology, and good luck finding a Comparative Sexuality textbook that’s not written by a woman and with a slant that men’s “funny little parts” are the reason the world sucks. Feminists want *all* of the reproductive power, pleasure, and pride, while doing nothing at all to earn them.

This explains another reason why anal sex must brutalize and torture your woman. For her entire life—at least as long as you have been hearing that you are a second-class citizen because of your cock—your little slut has been hearing that she's the one with all the power and control in any and every sexual relationship because of her pussy.

- In movies: she sees women decide whether or not to have sex because they aren't in the mood.

She doesn't see: the man who isn't in the mood at all but still risks his life to protect his woman, or the man who is exhausted and sore and not in the mood to drag his ass to a difficult job every day to provide for that woman.

- On television: she sees women taking care of incapable men who can't make a fucking sandwich without help.

She doesn't see: the men who writhe in a hospital bed or suffer an injury to protect them from harm, or that incapable man performing backbreaking labor so the sandwich-maker can have a good life.

- In media: she sees bizarre advice from Cosmopolitan magazine to destroy or damage a man's belongings when he spends more time, for example, playing video games than catering to her whims and desires.

She doesn't see: the man working up the courage to speak to her because his entire life he's been beaten down with the idea that her pussy is gold-plated and if he can just be sophisticated enough she *might* like him and *might* let him in there to play a bit.

Anal sex must be painful for your woman because she must learn to *submit* to you sexually. Even though she will most likely *cherish* and *enjoy* being dominated by you sexually, she has to break through decades of emotional and social conditioning before she reaches that lofty plateau.

Submissive women are frowned on in polite society. Feminists have long ignored the criticism that they work to give women the right to choose *as long as they choose what the feminists want*. As long as a woman works, votes democrat, supports the acts of reproduction that feminists say she should support, and is the dominant in the family, feminists are happy.

July, 2011

But if a woman chooses to be submissive to a man sexually, stay at home and raise a child, or (God forbid!) be a republican or conservative, why... she must not really be a true *woman*! She's been brainwashed by the evil men! Save our sister, sisters!

What utter *horseshit*! Yet despite its complete lack of factual premise, evidentiary support, or even logic, thundering and shrill denunciations of female submission have been battering your slut's earholes her entire life.

I *know* you love your wife. I *know* you don't want to hurt your girlfriend. You don't want it to hurt because "making love shouldn't be painful," right?

Then why are you here? You're eight pages into an essay justifying the forced, brutal, and cruel sodomy of the woman you love.

Fact is, there's something missing in your sex life and you're searching for it. Porn has taken a decidedly vicious turn the last few years. In the 1990s, the *Rough Sex* series got its director and producers arrested. Now, [Facial Abuse](#) is one of the largest (and best, by the way) adult networks on the web.

You're continuing to read for the same reason 35% of my forums are female: you know that deep down inside female dominance is emotionally unnatural and confusing to you. If male, you're looked at as scum if you don't bring home a paycheck and support

July, 2011

your woman (and you are, by the way), but she literally has *no* sexual obligation to you. In fact, if she decides arbitrarily to go fuck a complete stranger, you'll be lucky to escape from the divorce with half your belongings and partial custody of your kids.

If you're female, you can tell that it turns you on when a man grabs your hair, slaps your ass, or takes control of you, but you probably don't know precisely why that is. You're mesmerized by the idea of painful or humiliating sexual acts. You want it in your vanilla life, but you don't know how to ask for it because society has told you that, "Nice girls/Strong women don't *do* or *want to do* such things."

The both of you know the truth: anal sex is supposed to be brutally agonizing for a woman because she needs to submit to the pleasure of her man. She needs to provide her body as a reward for her provider. It needs to *hurt* because the *more* it hurts, the *more she proves her*

July, 2011

*submission*, and the more she demonstrates what her love and unconditional commitment to her man truly means.

In the Stephen King short story [\*Quitter's, Inc\*](#), the main character has been trying to quit smoking for several years when he goes to an organization recommended by a friend. The organization gives him the chance to back out, and then, after he signs the paperwork, explains the deal.

If he's ever seen with a cigarette, his wife will be kidnapped and placed in a room where she will receive non-fatal, but extremely painful, electric shocks while he watches through a one-way mirror. As to be expected in a horror story, this happens.

After the event, while he's babbling to his wife about how sorry he is, he explains what the torture was about and her terror and pain abruptly vanish. Not only does she forgive him, she tells him that if he slips up again she'll volunteer to be shocked, *because a little pain is worth it as long as he quits smoking!*

It's a good read. I recommend it, and I hope you've not lost the point. The main character's wife demonstrated unconditional love and commitment to her man. She endured agony, without knowing why at first, and was willing— immediately after the fact— to endure it *again* out of love for him.

July, 2011

This whole essay can really be broken down to three main points:

- Women are genetically predisposed to submit to dominant men, but have not been doing so for the last few decades because of societal pressure against such submission.
- This lack of submission is unfair to man and woman both because it places them both in roles for which they are genetically unsuited and unsuitable.
- Anal sex proves submission to a man because it hurts, therefore the more it hurts, the more submission, the more commitment from the woman to the relationship. A tearful, agonizing buttfuck is one of the holy grails of sexual submission, along with giving up your throat and allowing him to share your body with other men at his discretion and command.

Women are wonderful creatures and I love them very much. However, I also understand their role in society and in reproduction better even than most of them do. Men exist to fuck. Women exist to *be* fucked. When we began overturning those roles, notably in the 20th century, our society began to fragment.

July, 2011

I propose that we men regain our rightful roles as the dominant in our sexual relationships.

-K-

I've got THREE Yahoo! Groups now:

Hammered Ass:

<http://groups.yahoo.com/group/HammeredAss/>

Dedicated to women getting what's coming to them!

Hammered Throats:

<http://groups.yahoo.com/group/HammeredThroats/>

Kneel, open, take it! Your ears make great handles!

Hammered Wives:

<http://groups.yahoo.com/group/HammeredWives/>

She said, "I do" and she certainly DOES!

Oh yeah, I even have a blog now:

<http://slutwhisperer.blogspot.com/>

Because men shouldn't need to ask for what is rightfully theirs.

And don't forget to check out my pics on Imagefap!

<http://www.imagefap.com/profile/Kolbath>

I'll show you mine if you show me yours.
