The States PT/Troop cruiser is the first operational troop missile cruiser in Starfleet. These unique vessels have gained the respect and admiration of their crews because of their handling characteristics and offensive capabilities. The overall design came from Terran MACOS Engineering design teams to create a cruiser with photon torpedoes as its main weapons. The main troop capacity was increased to 160. It is the first ship in Star Fleet to have holodeck troops. It is also equipped with 2 of the only 80 man troop transporters in existence.

The teams took the old Starstalker Class secondary hull spacefram and a Constitution II Class primary hull. These ships have so captured the heart and spirit of the Terrans that the majority are crewed solely by them. All have been named for all states of Terra. The States class forms the core of all squadrons in the famed "Beta Terra Fleet", and is an integral part of front line troop cruiser forces for Star Fleet.

The warp engines are mounted like the Starstalker class and with Excelsior warp engines. As with all Star Fleet vessels, the engines can be jettisoned in case of an overload in the matter/anti-matter chamber.

The States PT/Troop Cruisers saw great use in battles against the Klingon, Tholian, Breen, and Romulan empires. The ability to saturate a target with photon torpedo fire proved an excellent way to cripple targets at range, making all the strongest cruisers and the fast transport assault troops sufficiently so skirmish units could finish the job.

special: 2x 80-person assault transporters
