

K'KMARAK CLASS VI RESEARCH VESSEL

Hull Data:

Numbers — NCC 24301-24320
Model Numbers — MK I
Date Entering Service — 2 04
Number Constructed — 8
Size
Length — 180m
Width — 68m
Height — 35m
Weight — 75,000mt
Cargo Units — 110

MK III
2 10

Engines And Power Data:

Total Power Units Available — 17
Movement Point Ratio — 2.1
Warp Engine Type — FWC-1
Number — 1
Power Units Available — 14
Stress Charts — N L
Maximum Safe
Cruising Speed — Warp 8
Emergency Speed — Warp 10
Impulse Engine Type — FIC
Power Units Available — 3

K'KMARAK CLASS VI RESEARCH VESSEL United Federation of Planets

These vessels have been named in honor of an early Vulcan scientist and explorer. *K'kmarak* vessels carry on in the tradition of their namesake. All ships in this class are designed for extended stays and therefore have large living quarters and working areas.

The *K'kmarak* was developed as a research ship only. It was never intended for combat and only carries its phaser complement to meet with Star Fleet regulations. No ships in the research or exploration missions are allowed to travel without minimum weapons.

When the MK I was first commissioned, the need for a research vessel in the rimward areas of the Federation was greatest. As each ship in this class was completed, it was sent to this area to aid in the expansion of the territory. The *K'kmarak* was instrumental in mapping this great expanse of space and in establishing contact with heretofore unknown races.

All ships of this type have the most extensive laboratory facilities aboard any Star Fleet ship. They are capable of

performing the most intricate of planetary studies and have monitored and recorded several novas. It was during one of these investigations that a *K'kmarak* class vessel the *USS T'pool* (NCC 24307) was engulfed by a stellar explosion that covered 1200 A.U.'s in 20 hours. Luckily for the Vulcans aboard, their ship was caught up in a solar wind of phenomenal proportions and pushed away from the main thrust of the radiation. When all had settled, the *T'pool* was still intact and flightworthy. The crew however had suffered within a few days. This ship wandered about for several weeks until it was discovered by the *USS Agincourt* (NCC 4314) a *Larson* Class destroyer. The crew were beamed aboard and the *T'pool* was left adrift with marker beacons on, warning any approaching vessels to stay away. When ships were dispatched to recover the hull, it was nowhere to be found and has not been seen or heard of since. All in all, the *K'kmarak* class has served its purpose well and is still in service today. It should be noted that all *K'kmarak* class ships are crewed by Vulcans only.
