

FASA Planet Compilation Project- "The Orphans" Version 3.0 (2/18/07)				
Source	Page	Planet/System	Coordinates	Notes
2202 Witness for the Defense	6	Hydrallis IV/?	see notes	Probably a colony; "2 weeks away at Warp 3" from Janus VI- or Janus, in the Federation Sourcebook, which is the homeworld of the Horta; 2 weeks at Warp 3 equals 0.29 parsecs by my math, perhaps a binary system with Janus VI's star? FASA has a measuring tool (I think) in one of its supplements; this may yield a different result. Logical that planet would be along the Enterprise's patrol route, since the adventure uses Ent. Crew as PCs
2218 Return to Axanar	31	Gamma Colony III/?	see notes	Birthplace of NPC; perhaps one of the "Gammas" listed in the Fed sourcebook?
2205 Denial of Destiny	4	Aleriad/NCG-994	see notes	Located in "extreme forward quadrant of Federation space" (south of Arcadia?); technically destroyed, but would be a cool addition
2223 The Dixie Gambit	48	Kroja/?	see notes	Birthplace of NPC; also listed as in Beta Quadrant of Klingon Empire
	45	Irashkar/?	see notes	Birthplace of NPC; Beta Quadrant; an Orion Subject World
				of the Klingon Empire, so probably near Orion space/neutral zone
	43	Kargath/?	see notes	Birthplace of NPC; Beta Quadrant; not to be confused w/ Kargenth
2217 Where Has All the Glory Gone?	46	Beta Vela/?	see notes	Birthplace of NPC; actually listed as "Trojan Colonies, Beta Vela", but following layout of other birthplaces in the adventure, Beta Vela is the planet and Trojan Colonies is the specific location on the planet
	40	Tar-sung Colonies/?	see notes	Birthplace of NPC; actually listed as "Ming Province, Tar-sung Colonies"
2207 Demand of Honor	5	Maltharin II/?	see notes	"10 days from Clanhaven at Warp 6", by math: 1.65 parsecs away;
				"very near the frontier"; in Fed space, but actually has Gorn dilithium
				cracking station on it (abandoned pending Clanhaven talks)
	37	Veldenia V/?	see notes	"3 parsecs from Maltharin II"; deeper in Fed space than Maltharin II
	5	Clanhaven/?		I thought this one was mapped, but I can't find it anywhere; from text however, it is definitely a planet and within Fed space near the Gorn/Federation border
2001 Again, Troublesome Tribbles	12	Aleph III/?	see notes	Outpost world only; "in Organian Treaty area near Klingon space"; evidently along Enterprise patrol route
2001 In the Presence of My Enemies	28	Lorealyn III/?	see notes	Independent system; other planets in system are settled as well (II&IV),
				but Lorealyn III is homeworld; "lies in the Organian Neutral Zone between the Federation and Klingon Empire
2221 Old Soldiers Never Die	45	New Namibia/?	see notes	Birthplace of NPC; Federation colony very near Orion space; actually listed as Wunagaland, New Namibia
2215 Triangle Campaign	33	Tautallus III	see notes	Home office location of Maremaunt Corporation, maker of photon
				weaponry; chartering organization: UFPSC
8411 Stardate No. 1	16	Sorvalo IV/?	see notes	Birthplace of NPC; a member of this race (Sorvalo) was the first of his kind to
	20	Tanar X/Tanar	see notes	"live and work" off the homeworld; he applied to Merchant Marine Academy
				"1 week away at Warp 7" from Klingon border, by my math: 1.83 parsecs; small Federation colony and near where the rendezvous between Valkris

and Lord Kruge took place in ST: III				
8412 Stardate No. 2	40	Arnos IV/?	see notes	"Remote tribute world" occupied by Klingons; probably along western Klingon frontier
8501 Stardate No. 3/4	6	Quilian IV/Quilian	see notes	Far enough away to be "exotic", but close enough for private tour companies; within Federation space; Prime Directive protected
	35	Tau Omega III/Tau Omega	see notes	"About 12 parsecs from RNZ in the direction of the galactic core", within Federation space; Prime Directive protected
8502 Stardate No. 5/6	9	Aeon VI/?	see notes	"Outer fringe of the Federation Exploration Zone"; quarantined world
	15	Hyla/?	see notes	Homeworld location unknown; only one of the race (Hylan) yet encountered; race actually from "Mutiny on the Enterprise" novel and adapted to FASA
	16	Hamal/?	see notes	Federation Full Member world; probably discovered 10-15 years before ST:TMP; race (Hamalki) actually from "The Wounded Sky" novel and adapted to FASA
Stardate No. 9	26	Beta-Origi Nebula	see notes	Nebula located in The Triangle; 11.3 parsecs away from nearest Klingon outpost
	27	Essai/Essai	see notes	Independent system; actually has a Dyson's sphere around star; located on the outer fringe of the Beta-Origi Nebula
	35	Korgocht V/?	see notes	Birthplace of Klingon/Human fusion NPC; located in Quadrant Beta of Empire
	35	Delta Pavonnis III/?	see notes	Birthplace of Klingon/Human fusion NPC; located in Triangle
	36	Battle Station 129GDT/?	see notes	Birthplace of Klingon/Human fusion NPC
	36	Konnos/?	see notes	Birthplace of Klingon/Human fusion NPC; listed as "Konnos Re-education Center, Ninth Frontier District"
Stardate No. 10	58	Ceti Alpha V/Ceti Alpha	see notes	Although never mapped to my knowledge by FASA, the infamous planet's location can be deduced. Ceti Alpha is listed as Alpha Ceti in Star Trek: Maps; Alpha Ceti is aka Menkar in the constellation of Cetus; ~67.5 parsecs from Earth
Stardate No. 11	39	Orodanga/Eta Virginis	see notes	Homeworld of the Dayan- the "little people" seen in "Journey to Babel"; ~77 parsecs from Sol; I've spent over an hour trying to figure out what direction Eta Virginis is from Sol- you probably have a better grasp than me
Stardate Vo. 3 No. 4	229	Laflin/?	see notes	"...freighter...was en route from Laflin to Capella with a cargo of unprocessed dilithium and cesium ore."; in Triangle sourcebook
	229	Aarris/?	see notes	Independent Triangle world; in Triangle sourcebook
	229	Lanroche VII/?	see notes	Home of "Fred's Unusual Stellar Spacecraft"; in Triangle sourcebook
2203 Spacelanes	12	Gamma Demetrius/?	see notes	"The USS Sentry encounters and confronts Klingon cruiser Devisor near Gamma Demetrius. A brief exchange of fire marks the first official contact between the UFP and Klingon Empire."
	14	Open Door/?	see notes	"UFP tradeworld"; invaded and occupied in the Four Years War by Klingon warships "acting as allies of the Axanar star group..."; occupied only 28 days (beginning 1/9411.02, only ~2 months into war); located "outside UFP space but owned by UFP-chartered companies"; liberated

	26	Paldon V/?	see notes	by elements from Starbase 15, but these were already enroute to the front
	28	Outreach/?	see notes	Water world contacted by Federation scout; 2 years later 17 Paldonians were UFP/ITA members; places First Contact between 0/87 and 2/21
	62	Ja-eq/?	see notes	"...a joint facility on the planet Outreach...has been established for the joint training of a small number of both Klingon and UFP students" to learn Klingon and UFP merchant procedures; (called Natagavrisha, "that which is handled at a distance", in Klingonaase)
	74 back	Galish IV/? Denro IV	see notes see notes	Human colony world; a clue to when it was colonized: "The low gravity of his native world had done its work. His ancestors had been normal Earth humans, but Lovak and those of his generation were all 2.5 m tall or more
Dragon Magazine 96	73	Dicameron VI/?	see notes	Tellarite colony world; probably near Orion space
				"...only 9 parsecs from Deneb." Home of the Orion woman on the back cover
Dragon Magazine 104	79	Kzin/61 Ursa Majoris	see notes	Location of Belter Industries, a "smaller construction yard"; built the "Ginny's Delight"
The Natural Order	4	Delleren V/?	see notes	Article adapts the Kzinti to FASA's ST universe...I say go for it!!; present-day, Kzinti limited to 12 planets and is considered a UFP protectorate
				Klingon-occupied world with native slave race; close to warship patrol routes
				because a ship is diverted from patrol to check out the "adventure hook" there-
				it will take the ship 3 days at Warp 5 to get there (0.32 parsecs from position of ship @ time of change of orders); considered a "safe" world- no trouble
				expected there
Challenge 38	49	Farreach Station/same	see notes	
	49	Calamar II/Calamar	"	
	50	Sirus Alpha/Sirus ?	"	
	50	Sirus Beta/Sirus ?	"	
	51	Rondor IV/Rondor	"	
	53	Zenophen/NGC-238	"	See the article on the "Beta Antaraes Sector"
	54	Keplar's World/Keplar ?	"	
	54	Beta Antarus IV/Beta Antarae	"	
	55	Tamara II/Tamara	"	
	56	Anaron/Anaron I	"	
Challenge 41	48	Beta Reticuli III/Beta Reticuli	see notes	"...roughly 4.5 parsecs from the Romulan Neutral Zone"; has scientific colony;
				aka Sellain Colony; home to extinct race known as the Ralkyde
	50	Unnamed/?	see notes	unnamed Romulan arggricultural colony; home to Beta Reticuli III's extinct
				humanoids' ancient enemy*; "...approximately 87 days (from Beta Reticuli III) at
				Warp 6"; suggested name: T'Lach (ancient enemies' name: T'Lachnam) or
				an appropriate pre-existing Romulan world?, *enemy now extinct, too
Challenge 42		Federation Deep Space Station T-		Near Tholian border; starship enroute from Malla to here disappeared; ship

	68	11		see notes	was operating near UFP/Tholian border
Challenge 48	80	Argo/UFC 78856 (?)		see notes	located in "Quadrant 3 South near Deep Space Station K-9" and "nearly 40
					parsecs from Romulan Neutral Zone"; UFC 78856 system name from "Worlds of the Federation" by Shane Johnson of "Mr. Scott's Guide to the Enterprise" fame
	80	Deep Space Station K-9		see notes	equidistant from Romulan NZ and Klingon NZ at ~ 30 parsecs away from each
	80	Delta Triangle		see notes	between K-9 and the Klingon Border (I know you already have an idea where the Delta Triangle would be located, and I concur. This shouldn't mess that up.)
	80	Phylos/Phylos (?)		see notes	VERY near border with Delta Triangle and also not too far from Argo; "Worlds of the Federation lists it as "Phylos II"; system name from "Worlds..."
					Editors Note: If we assume that these systems are indeed the same systems used as locations in TAS, we have some general info to conclude that these systems could be near to one another. The episode with Phylos occurs only five episodes after the episode with Argo. Even more interesting, however, is that the episode before the one with Phylos is the episode with the Delta Triangle!! If so, both Phylos and Argo would be Independent worlds
Challenge 49	72	Abaddon (?)/1124-3 (?)		see notes	Abaddon is the name of a creature living on a rogue planet* in "anomaly 1124-3"; the anomaly is 0.08 parsecs from the Enterprise (TOS) regular patrol route; "the region is claimed by no known species, and no Federation ship has ever logged a voyage thru there"; however a commercial freighter did enter the area; region appears to be two light years across on sensors, but of seemingly unlimited volume; *no star; Abaddon is name of angel in the bottomless pit in the Bible
Challenge 52	50	Ferengal/?		see notes	Straight from article: "The term 'Ferengi Empire' may be somewhat of an incorrect
	50	Betazed/*		see notes &	statement. The Ferengi do control a few planets within the Federation Exploration
				*Wunderwelten 38	Treaty Zone, and they use them chiefly as bases for the navy and also as merchant
				article below	outposts. They do not, however, seem to colonize worlds on the mass scale as humans have. As of yet, there is no defined border for the Ferengi territory and even most Ferengi-controlled worlds have not been recognized as such by the UFP. Rather, the Ferengi Empire is an empire of trade...The exact size of the Ferengi sphere of influence is not known. Ferengi ships seem to be spreading as fast as possible through the newfound Federation frontier...Already the trade empire has extended itself along the spinward border of known space even as far as Betazed, nearing Tholian territory...[Ferengal] undoubtedly lies somewhere along the Federation's spinward border."; TNG era
Challenge 53	60	Space Station K-2		see notes	Klingon sector near Organian Neutral Zone; TMP era
Challenge 63	65	Starbase 210/?		see notes	Fairly near "Klingon Neutral Zone"; definitely a planet; triple digit starbase in TMP era...
Challenge 64	63	?/Sadalbari system		see notes	System "not far from Romulan Neutral Zone" and near TOS Enterprise's patrol route; uninhabited system, but evidently commercial traffic comes through it
Challenge 66	72	Paklar/Rhomboid Dronniga		see notes	Home of the TNG Pakleds; no other info available

	72	Starbase 515/?	see notes	no other info available; however Starbase 515 used as location in TNG's "Samaritan's Snare"- the episode that introduced the Pakleds; Starbase 515 is in the Scylla Sector; online source has the Scylla Sector near the Epsilon IX sector
Wunderwelten 38	75	Betazed/Beta Veldonna	see notes	Per Challenge 52, "spinward and rimward"; system name also used in "Worlds..."
Wunderwelten 39	84	Bolaris IX/?	see notes	We could find a system for it out of another source with ease, if needed.
Wunderwelten 40	60	Silako IV/?	see notes	Cardassian colony; TNG era
Wunderwelten 44	87	see notes	see map	Scores of systems on updated Triangle map
2011 The Federation				Mentioned in "The Federation", but FASA got 'em from "Space Flight Chronology". Species are avians and call themselves Canaris. Planet located in Sector 14C.
Challenge 36	80	Alpha Virginis II/Alpha Virginis	see notes	
	63, 67	?/LK-1257	see notes	"Starbase 9 is the nearest Federation outpost, 30 days away at Warp 3." Discovered in 2/10 by TOS Enterprise and crew. Star went nova between 2/10 and 2/22
Challenge 56				Homeworld of the Eltanin; an independent system that must be close the Orions, Klingons and Federation (trades with all three AND gets Klingon weapons and engines...). Eltanin V has unchallenged claims to 3 nearby star systems devoid of life. Preserver "colony" of Terrans.
	56	Eltanin V/Eltanin system	see notes	
	56	Eltanin VII/Eltanin system	see notes	Class M world colonized by the Eltanin with 1 million inhabitants.
	59	Tania Borealis IX/Tania Borealis	see notes	"Federation colony world"; probably close to the Eltanin system. Is it even possible since Tania Borealis is a "real" system?
Struggle for the Throne mini-game	--	Bardur/?	see notes	These planets were included on the "edge hexes" for the mini-game "Struggle for the Throne". In that game, these planets' systems "surround" Klinzhai and are used as bases for rival fleets. I would say that these planets could easily be included as planets of some importance within the empire (and maybe they do "surround"/encircle Klinzhai...
	--	Klevaan/?	"	
	--	Mengel/?	"	
	--	Morbus/?	"	
	--	GarKallos/?	"	
	--	Klinja/?	"	

FROM "Stragglers.xls" file:

2218A The Four Years War	Map 5	Sector 23-D/?	see map	
	Map 5	Sector 12-5/?	see map	Probably actually Sector 12-J, as the pattern for Sectors is Number-Letter; Sector 12-J is mentioned on page 36 and fits Sector 12-5's location
	Map 4	Sector 23-H/?	see map	
	Map 4	Gleo/?	see map	Probably meant to be "Geo"
	32	Beta Cersus/?	see notes	"The interplanetary war of Beta Cersus within the Romulan Neutral Zone does not involve Federation ships, but causes the Federation Council to reverse its position on new starship construction..."
	17, 35	GR-1/?	see notes	"Stardate 1/9505: The Battle of GR-1 and the Assault of Nozseca VIII are fought.

2221A The Romulan War (note: Maps on pp . 22-26)				Both end in Federation defeat."; in UFP territory
	23	Sector 7C?	see map	Listed on map as Sector 7; text on page 13 indicates that the entry should be Sector 7C
	23	Sector 7L	see map	
	23	Sector 5K/?	see map	
	24	Sector 10E/?	see map	
	25	Sector 5B comp./?	see map	Listed in text on pg. 17 as home to a mining complex; Drop the "comp."?
	11	Sector 5D/?	see notes	Agricultural colony
	20	Drulaxar IV/?	see notes	In area of Federation space where "Operation Golden Pheasant" took place
	22	Alpha Omega B/?	see map	
	24	?/Pretoric System	see map	
	24	?/Sexton System	see map	
	24	Eta Leonis VI/ Eta Leo.	see map	Perhaps we could rename this system or something if it doesn't work here?
	25	Nu Chalcedonis/?	see map	I know you have it; Romulan name is Lasustelvan- "Lasus' Sorrow" -text, pg. 18
	25	VP 18 Mark 30.2/?	see map	"While advancing into uncharted space, Star Fleet's Forty-Fourth Cruiser Squadron detects an unprotected Romulan deep-space supply depot. The small station, located at Deep Space Coordinates VP 18 Mark 30.2, is destroyed without Federation casualties." pg. 46
	26	UFP Outpost/?	see map	You probably know of this already
	39	New London	see notes	Terran colony;
	22	OSDO 1, 2, 3 & 4	see map	Outer Sector Defense Outposts; "The OSDOs were, in essence, miniature, surface-based star bases. Built on small, uninhabited planets in frontier areas, they provided the same support services as their larger cousins for a fraction of the construction cost and personnel requirements."- pg. 14
	11, 15	Delta II	see notes	"...stationed at OSDO 1 in the Delta II system."- pg. 15
	8	?/Tallwi	see notes	"Computer projections suggest that the most likely areas for search are the Selka, Tallwi and Zephram systems."; relatively near Selka system?
	8	?/Zephram	see notes	
	17	Dacron/?	see notes	"The Dacronites are an amphibious race that the Orions found on a planet about four parsecs from Rigel. The race had reached its Industrial Revolution and was starting to theorize about space travel when the Orion slavers arrived. Now the planet is the private reserve for the largest family involved in the slave trade." "These creatures are otherwise unknown to Federation sources and have not been studied at all."- pg. 22

NEWLY ADDED ON Or AFTER 9/11/11

Polyhedron #32	25	Kella/Cantopolix	see notes	"Kella orbits a hot, green star known as Cantopolix, near the edge of Federation space"
----------------	----	------------------	-----------	---
