"These stats are the FASA-approved version."

"This information was transcribed (verbatim) from the original typed paperwork. I had scanned the original documents, but was unable to get a reasonable (dpi) web-quality image."

"The terms, 'Loaded' and 'Unloaded', refer to when the ship is carrying a full complement of gunboats; the extra weight tended to slow her down."

\* "Time of the Motion pictures. I eventually redesigned the *Galileo*; creating an updated warp driven version named the *Mercury*. It was assigned to the *USS Alliance*, NCC 1721 (Constitution II), under Commodore William Thomas O'Neal."
