

JAYNZ SHIPS OF THE GALAXY

Federation INDOMITABLE Class Battleship

CONSTRUCTION DATA:

Model Numbers	Mk I	Mk II
Ship Class	XII	XII
Date Entering Service	2/2208	2/2303
Number Constructed	4	1

HULL DATA:

Superstructure Points	42	42
Damage Chart	C	C
Size:		
Length	410m	410m
Width	170m	170m
Height	70m	70m
Mass Displacement	182,165mt	185,945mt

Cargo:

Cargo Units	550 SCU	550 SCU
Cargo Capacity	27,500mt	27,500mt
Landing Capability	None	None

EQUIPMENT DATA:

Control Computer Type	M-7	M-8
Transporters:		
standard 6-person	6	6
emergency 22-person	6	6
cargo	3	3

OTHER DATA:

Crew	580	620
Passengers	40	40
Shuttlecraft	20	20

ENGINES AND POWER DATA:

Total Power Units Available	84	84
Movement Point Ratio	4/1	4/1
Warp Engine Type	FWG-1	FWG-3
Number	2	2

Power Units Available	26 each	26 each
Stress Charts	D/F	D/F
Maximum Safe Cruising Speed	Warp 8	Warp 10
Emergency Speed	Warp 10	Warp 12
Pulse Engine Type	FIG-2	FIG-2
Power Units Available	32	32

WEAPONS AND FIRING DATA:

Beam Weapon Type	FH-11	FH-11
Number	8 in 4 bks.	8 in 4 bks.
Firing Arcs	2 f/p, 2f	2 f/s, 2 a
Firing Chart	Y	Y
Maximum Power	10	10
Damage Modifiers		
+3	(1-10)	(1-10)
+2	(11-17)	(11-17)
+1	(18-24)	(18-24)
Missile Weapon Type	FP-4	FP-4
Number	4	6
Firing Arcs	1f/p, 1f/s.	2f/p, 2f/s.
Firing Chart	1p/a, 1s/a	1p/a, 1s/a
Power to Arm	1	1
Damage	20	20

SHIELDS DATA:

Deflector Shield Type	FSP	FSP
Shield Point Ratio	1/4	1/4
Maximum Shield Power	16	16

COMBAT EFFICIENCY:

D	202.1	202.1
WDF	135.6	160.6

Shortly after the USS *Enterprise* was involved in the V'Ger Incident of 2/1704, and her resulting acid test of new systems, Star Fleet Procurement approved plans to build a battleship class. At this time, reports were also being received from Project Dixie and Project Grey Ghost intelligence agents that the Klingons were aspiring to build a successor to the *L-13* Class, and the Romulans were about to start construction on a battleship.

The approved design, code-named *Indomitable*, used the new FWG-1 units, along with the FIG-2 impulse drive system (which was not installed on the *Enterprise*), along with the advanced M-7 multitronic computer which had just been removed from the drawing boards and put into production. The M-7's use was a shot in the arm to Daystrom Data Concepts, since no one had yet found a use for the system. The go-ahead was given to build 10 *Indomitable* Class battleships, and construction began on the first four ships at the Sol III shipyards on 2/2012.

But on 2/2106, when Shuvinaaljis announced the development of TransWarp Drive theory, Star Fleet immediately cancelled the contract for the six additional *Indomitables* that were to be built, and announced that the four ships already under construction would be put into mothballs upon completion. The project contractors involved were startled. Everyone asked Star Fleet why, at a time when the Klingons and Romulans were about to deploy battleships along the borders, did they have to suspend construction on ten battleships? Star Fleet offered no explanation.

The four completed battleships were placed in mothballs on 2/2112, and the issue remained unresolved until the recently-promoted Admiral Joseph R. Holman, the leading proponent of the "Warp 10 Navy" concept, met with Admiral Randolph Morrow, Commanding Officer of Star Fleet, on 2/2202.04 aboard Spacedock. Holman discussed with Morrow the Battleship Dilemma; he also informed the Admiral that the Klingons were within six weeks of deploying a battleship capable of taking on the *Enterprise* Class one-on-one, and that the Romulans had already done so.

Morrow revealed the real reason for cancelling the *Indomitable* Class— "The Great Experiment" — to Holman, who agreed that the *Excelsior* Class was a welcome addition to Star Fleet, but while the TransWarp battleship was under construction and testing, the *Indomitable* was needed even more than ever to fill the void because, in simple terms, "The Klingons and Romulans have an enormous superiority over us when it comes to battleships. They have 2 while we still have none."

In addition, Holman convinced Morrow that the *Indomitables* would not be obsolete at all; their capabilities would be far superior to what the Klingons and Romulans would be producing. And when the time came to refit the class with TransWarp Drive, it would be just as capable as the *Excelsior*.

Following this meeting, Admiral Morrow called a press conference, with Admiral Holman in attendance. Morrow announced the reactivation of the *Indomitable* project, with the four completed ships to be brought out of mothballs at once and the construction of the six remaining ships begun immediately. Admiral Morrow also publicly revealed that the Klingons and Romulans were about to deploy the *L-24* ("Ever-Victorious") and *Z-1* ("Nova") battleships along their border areas. "This," he said, "only offers us solid proof that we need this type of ship where it (the *Indomitable*) is needed most . . . to deter possible Klingon and Romulan aggression." He also announced the existence of the heretofore rumored TransWarp Drive ship, the USS *Excelsior*, which was ready to undergo testing.

Four ships, the USS *Indomitable* (NCC-2010), the USS *Indefatigable* (NCC-2011), the USS *Dauntless* (NCC-2012), and USS *Incontestable* (NCC-2013) were simultaneously commissioned on 2/2208.01. All four ships were immediately sent to the Klingon and Romulan border areas. Their appearance has apparently evened the balance of power for the moment de-

spite having a smaller displacement than the *L-24* or *Z-1*, with combat capabilities vastly superior to their Klingon and Romulan counterparts.

The MkII is being fitted with the FWG-3 warp engines, the most powerful conventional Warp Drive engines in history, with Warp 10 standard and Warp 12 emergency speeds. The M-8 multitronic computer replaces the M-7, allowing the addition of two FP-4 photon torpedoes to the weapons complement, giving the MkII firepower comparable to the Mk I *Excelsior*.

The *Indomitable* Class is to be produced at the Sol IV shipyards at a rate of 2 per year, and will be produced in addition to the *Excelsior* Class.

DISPOSITION:

The following list of *Indomitable* Class battleships show their hull numbers, model number, date entering service, and current disposition. The disposition is represented by the letter codes given below and is followed by the date of occurrence, if known.

MK	Assigned to Klingon border, Military Operations Command			
MR	Assigned to Romulan border, Military Operations Command			
MG	Assigned to Gorn border, Military Operations Command			
R2	Refit to MkII			
UC	Under Construction			
NCC-2010	Indomitable	I	2/2200	MK
NCC-2011	Indefatigable	I	2/2200	MR
NCC-2012	Dauntless	I	2/2200	MR
NCC-2013	Incontestable	I	2/2200	MK
NCC-2014	Inevitable	II	2/2303	MG
NCC-2015	Solidarity	II		UC
NCC-2016	Inexorable	II		UC
NCC-2017	Indestructible	II		UC
NCC-2018	Dominion	II		UC
NCC-2019	Inflexible	II		UC

Indomitable Class design: Josh W. Spencer
