

One of our members, Jim Reese, obtained a batch of brush caps that fit the U90 motors (probably also UG7750). He will sell them for \$8/set of 2, plus shipping.

They have the 9mm x 0.7mm internal thread and fit U90 motors perfectly.

Also has brushes that will fit the motor with minor modification (sand the wide edge down about 1mm and solder the old spring/brass contact to the new brush copper braid). The length and short width are OK as-is. He will include a set of brushes with each cap set.

Let him know if anyone is interested in caps, or brushes (\$1 each separate). Please contact him via email off-forum.
