

**RESEARCH POSITIONS AT
MICROWAVE TECHNOLOGY CENTRE
UNIVERSITI TEKNOLOGI MARA**

UiTM's Microwave Technology Centre recently secured two research grants in the following areas:

- 1. Graphene-based microwave integrated circuit filters**
- 2. Development of flexible microstrip antennas**

We are looking for students to work as Research Assistants on the projects. Qualified students will be registered as PhD/MSc students at the university, and will be paid a monthly allowance of RM 2500 (for PhD) or RM 1500 (MSc). The award is for two years and is scheduled to start June/July.

Interested students are requested to submit your cv. Preference will be given to students with a sound background in rf/microwave circuit design and microelectronic fabrication. Short-listed students will be called for an interview.

Contact: **Prof. Zaiki Awang (zaiki.awang@gmail.com) or 019 383 0161.**

Closing date: 30th. May 2013
