## Immersive Film Festival - IFF'17

December 1 to 3, 2017

The Espinho Planetarium would like to invite you to the Immersive Film Festival, that will be held in Espinho, Portugal from December 1 to 3, 2017.

This festival is an event that will gather international productions, both 2D and 3D, in the Immersive Cinema field. It is an open invitation to this community, from producers, to students and planetarium professionals.

To attend is rather easy. Espinho is located close to the Oporto International Airport, served by the major international Airlines and by a large number of low cost carriers.

To participate, simply submit your work. This year there is a new content on-line submission format, simple and fast, no shipping required.

The Immersive Film Festival competitive section will award the best in fulldome productions, on two categories: Short Pieces (from 1 up to 15 minutes), and complete Fulldome Shows.

If you have any questions please feel free to email us anytime.

Further information is available on-line at [iff.multimeios.pt](http://iff.multimeios.pt).

You can also follow us on facebook at [/immersivefilmfestival](https://www.facebook.com/immersivefilmfestival).

Immerse Yourself! Hope to see you all at IFF'17.

The IFF organization.
