

An Introduction to Math and Physics through Fire Dynamics

A free, on-campus program for high school students (sophomores and juniors) exploring the mathematics, physics, and chemistry needed to understand and solve engineering problems

What – Participate in a series of interactive lectures and hands on experiments focused on revealing the math and physics defining basic fire dynamics with the Department of Fire Protection Engineering at the University of Maryland

Where – All program lectures take place on campus at the University of Maryland, College Park

When – Eight classes, Tuesday nights, August to December, 2016
