The Underground Railroad for New Life

We grow healthy babies by providing support to
their moms during and after pregnancy!

"I dream that my baby will grow up and be a good student and finish school and go to college. I want her to have a happy life. I want her to be safe, not pregnant when she is a teen, not hanging around with the wrong people...to know that she is loved. Most of all I want her to know God because then she will know that all things are possible. In order to make my dreams for my baby come true, I need to finish school so that I can get the kind of job I need to provide her a safe place to grow up. I need to read to her so she will like books and think that learning is an O.K. thing to do. I need to practice my own faith. I need not have more children until I am sure that I can do what I need to for this baby.

My sisterfriend can help me by continuing to do what she is doing...just be here for me to help guide and show me the way."
