

SUMMER COURSE

TRAINING OF INTERNATIONAL YOUNG PROFESSIONALS IN DISASTER MEDICINE AND MANAGEMENT

11th-23rd July 2010

Gadjah Mada University, Yogyakarta, Indonesia

Do you know that all countries around the world are challenged by different emergencies and disasters? Knowing this, what can medical students do? Come and Join us! The interactive integrated circular modular curriculum based on international standards and methodologies will meet your expected competence as medical students.

By joining, you will get:

- knowledge, skills, and practice on disaster medicine and management as well as experience sharing from different professionals from different levels.
- to act as in a real emergency and disaster situation.
- to operate as a team on managing this situation wisely and strategically.

Most importantly, you will be able to strengthen international networks with medical students from different universities around the world.

After completion of the training course, you will be presented with certificate, accreditation points, learning and reference materials in sets of DVD package.

So, what are you waiting for?

Online applications is available at www.summertimecoursegmu.org from now until 20th June 2010.
