### **WHAT IS LUCIA N3 LIGHT**

Julia Kosmynina is a open hearted light worker she will treat us with the Lucia Light which is a special lamp, it is a neurostimulator, which combines flashing and constant light to stimulate temporary EEG brain wave patterns that help users achieve a hypnagogic trance. These brain wave patterns would usually only appear after several years of meditation practice.

The Lucia N3 lamp offers the benefits of deep meditation through accessing an expanded state of consciousness almost immediately. This state of consciousness creates a bridge between the worlds of dreams and reality.

The white light passes through your closed eyelids into the pineal gland, often referred to as the third eye, which is stimulated to produce mind-activating hormones. It also creates a completely unique visual experience that is entirely the result of your own consciousness.

Faced with the artistry of ones own inner consciousness, light traveling brings peace and relaxation, each experience is as unique as the person in the light.

With a series of regular sessions on the Lucia N°03 Light Lamp you can literally train your brain to reach this optimal state at will. Even after one session it is easier to drop into a state of deep meditation, since your brain now knows where it's going.
