Sensex was open near 33149 at the beginning of the year that it showed up low surface below 32500 now it is trading near 36000 by breaking current level 34000 since heavy depression from the historical high level of above 39000 while the other; our regular readers know we said that the historical high level in

time when Sensex was running around the historical high between 38500 to 39000 where the other experts are talking about 43000 to 45000 accordingly; it showed huge decline of 6000 points above in just two months period. Our entire recession pro recommendation given at last year has shown at least 15 to 40 percentage

of decline in the improving market. Sensex have found 1300 points of reform with high volatile trend in annual terms.

Nearest down Bollinger band is opening below 35379 to 34690 in Sensex which can be considered as near support when likely to remain update pro move in the decline of above 35379 with short covering and the low can be seen up to 34690 by breaking the crucial support and being close below it. Mid cap/ small cap and heavy

weight stocks are still breaking in the depression pro move of market given that; traders and investors should adopt trading oriented view for trading and invest in strong fundamental and accurate breakout stocks when we will provide downturn pro target in some selected stocks which will give you 20 to 25 percentage of decline in very short term. Sensex creates on one year chart pattern of bearish gartley which gives signal for unchanging downturn pro move below near resis-

tance 36694 and 37200 from high when the pace of boom will be seen moving forward with upper target 37200 after crossing 36694 and giving close on it. DECEMBER DERIVATIVES EXPIRY WEEK CLOSSES IN GREEN

Final week of CY2018, that had just four sessions with Christmas Holiday on Tuesday. The week marked weak opening on Monday but thereafter, it posted gaining momentum for the rest of three sessions and closed the week in green. In fact even derivatives expiry marked green closing. Thus shorter and final week of CY2018 ended on a positive note. As expected, the week remained highly volatile with pros and cons from global as well as domestic front on various counts like China-US trade war, Brexit worries, tumbling Crude Oil, Rupee-Dollar parity, overshooting CAD target, GST matter etc. etc. Even year end NAV building exercise too was at the center stage for the week.

Trading for the week began on a subdued note. Key indices ended lower on Monday amid negative global cues. BSE Sensex lost 271.92 points to close at 35,470.15. Nifty lost 90.50 points to end the day at 10,663.50.

The domestic equity market remained closed on Tuesday, 25 December 2018, on account of Christmas Holiday..

Domestic stocks ended with modest gains on Wednesday after a highly volatile session of trade. Gains were supported by upmove in index heavy weights HDFC Bank, HDFC and Reliance

Industries. BSE Sensex rose 234.51 points to end the day at 35,704.66. Nifty rose 66.35 points to close at 10,729.85.

Key indices settled with modest gains to close higher on Thursday. Positive global cues supported gains on the domestic bourses. Nifty settled below 10,800 mark after opening above that level. The Sensex settled below 36,000 mark after opening above that level. BSE Sensex rose 157.34 points to close at 35,807.28. Nifty rose 49.95 points to end the day at 10,779.80.

The market rose for third straight trading session on Friday backed by positive global cues. Buying was witnessed across all sectors, with banks shares in the lead. The Sensex reclaimed the 36,000-mark after opening below that level. Sensex rose 269.44 points to end the day at 36,076.72. Nifty rose 80.10 points to close at 10,859.90.

Oceanic Foods deferred the bonus announcement for next board meeting.

During the week scrip turned ex-split included Sayaji Ind (2 for 1) and Guj. Gas (5 for 1).

During the week dividend announcement came in from Shanthi Gears (500%), Selan Explo (50%) etc.,

Dollar moved around Rs. 70 a dollar during the week with narrow movement either side.. Brent Crude Oil further eased to recent new low of 50\$ a barrel and settled around 53.40\$ by week end. Ensuing week will also remain volatile as FIIs will be on Holiday mood. However, global and domestic macro economic data will continue to impact market sentiments as usual.

Amidst such a scenario NSE Nifty and BSE Sensex may hover between 11200-10200 and 36950-34550 respectively for the ensuing week.

Indian Wood to consider bonus issue on 02.01.19..

Birds view on CY 2018:

On technical grounds, CY2018 ended on 27.12.18 itself based on its settlement cycle. 28th and 31st Decembers trades are counted as new CY2019 trades as their sentiments cycle falls post 1st January 2019. ON technical ground last year on 28th December 2017 Nifty closed at 10477.90 and BSE Sensex closed at 33848.03. Nifty marked 52 week high/low of 11700.20/9951.90 and on Friday it closed at 10859.90, thus it gave a reward of 3.65% while BSE Sensex marked 52 week high/low of

As can be seen from the table below, during the week, indices moved in the range of 10893.60-10534.55 and 36194.76-35010.82 for NSE Nifty and BSE Sensex respectively.

38989.65/32483.84 and on Friday ended at 36076.72 giving a reward of 6.47 %. Vast difference in rewards from these two benchmarks is on account of different weightage and list of scrip for their main indices.

IN CY 2019, general election and the faring of monsoon will have major impact on the sentiment of the market. On re-instatement of BJP government, indices may scale to new heights and support from normal monsoon will give push. No doubt global event too

will be at center stage as following liberal trade pact with world markets.

**Trading levels --- 31st
DECEMBER 2018 / 4th
JANUARY 2019**

THERE IS A HOPE OF GLOBAL "CHILL " IN EQUITIES RECEDING IN THE NEW YEAR ...

LAST WEDNESDAY MID DAY, WE WERE THREATENING TO MAKE A SIGNIFICANT LOW ON NIFTY, WHEN SUDDENLY THE DOW FUTURES SHOWED AN UP-SWING. AS IF ON CUE, THE NIFTY MADE A SIGNIFICANT TURN-AROUND .

We are now at a striking distance of 11,000 - the magic number - and everyone is hoping that we will close above that on 31st December.

It is very clear that LINKAGE is once again proved - beyond doubt. SO WE HAVE TO WATCH THE GLOBAL MARKETS - particularly the AMERICAN MARKETS very closely.

All these markets are in big trouble and need some significant ELIXIR to change their long term down trend. WE HAVE TO WAIT AND WATCH WHAT IT COULD BE AS THE GLOBAL GROWTH SCENARIO IS EXTREMELY GLOOMY.

The new year euphoria has to die down for taking an investment call on the market. ACTUALLY THE THIRD QUARTER FY 19 RESULTS WILL GIVE A GOOD POINTER TO ACTUAL STATE OF THE ECONOMY. By then, we would be that much closer to general election 2019 and we will have some more clarity on how the battle lines are getting drawn.

I AM CONVINCED THAT THIS GENERAL ELECTION IS GOING TO BE LIKE THE 18 DAY MAHABHARAT WAR AND WILL CHANGE THE POLITICAL EQUATIONS FOR SOME TIME TO COME.

CURRENTLY, I AM RATHER TOO BUSY TO MAKE A DETAILED POST ABOUT THE PROSPECTS FOR CY 2019. BUT, I PROMISE TO COVER THIS AND ALSO INDICATE ABOUT 20 STOCKS WHICH SHOULD BE ACCUMULATED ON LONG TERM BASIS AS AND WHEN MARKETS DIP DUE TO ELECTION EFFECTS.

WISHING ALL A HAPPY AND PROS-

PEROUS NEW YEAR 2019

As I always say, we have to play percentages to make money. Bold bravado or blind consensus following does not help. I HAVE JUST GIVEN YOU SOME FOOD FOR YOUR GREY CELLS. WHAT DO YOU SAY ? ? ?

CAPRI GLOBAL HOUSING FINANCE AIMS 29 X GROWTH IN AUM TO CROSS RS 7,000 CRORE BY 2023

Mumbai, December 2018: Capri Global Housing Finance Limited (CGHFL), a subsidiary of Capri Global Capital Limited (CGCL) - a leading NBFC lending primarily to MSME and Affordable Housing Sector - aims to clock 29-X growth in AUM, to cross Rs 7,000 crore, over the next four years.

CGHFL is aligned to Prime Minister Narendra Modi's mission to provide 'Housing for All' under the Pradhan Mantri Awas Yojana driven by UNDAF. CGHFL is engaged in servicing the underserved borrowers with a customized lending process driven by extensive quality checks and robust underwriting. The Company has an average ticket size of Rs 11 lacs.

Speaking about the housing finance business, Mr. Rajesh Sharma, Founder and Managing Director at Capri Global Capital said, "India is

urbanising at the rate of 1.2 percent a year and we remain very optimistic about the growth in our housing finance segment. Currently, the company has strong presence in Northern and Western region and plans to expand the business in new geographies like Tamil Nadu, Karnataka and Andhra Pradesh. Capri Global Housing plans to set up a network with 200+ branches by FY23."

He further added, "We have invested in client-centric, process-driven technology for better customer experience."

Rapid industrialization and migration to cities have caused massive urban housing shortages in India, specifically for the economically weaker sections. The NDA government plans to build 2 crore affordable houses by March 2022. Also, the mortgage penetration in India is about a decade behind other emerging markets such as China and Thailand. However, due to various structural economic drivers such as a young working population and rising income levels, growth rates in the mortgage segment will remain healthy over the long term.

Capri Global Capital's total AUM is Rs 3,489 crores as of September 30th 2018 and operates across 76 branches in 8 states. The Net Worth of the company is Rs 1,302 crores.

VOLATILITY CONTINUES AS THE BENCHMARK NIFTY50 OSCILLATES SHARPLY

Volatility continues as the benchmark Nifty50 oscillates sharply, to end the week marginally positive by 1.3%. Hence there is no change to the underlying trend of the market, which is still non-directional with a marginal bias on the upside. We continue to maintain the same view on the overall market that of cautiously bullish as we expect the index to stay volatile as long as levels of 11,000 on the upside and supports of 10,500 is not breached convincingly. The best aspect at the current situation, is the fact that the underlying momentum of the index is on the upside, which raises the possibility of a positive breakout for the Nifty50. But

in terms of price, we need a sustained break above 11,000, preferably with contribution from large cap stocks. BANKNIFTY comparatively is performing better, as the momentum for the index in both the short and intermediate time frame is positive. This indicates that outperformance from the banks can continue if the Nifty manages to break

above the psychological 11,000 mark.

NIFTYPSU Bank is one of the biggest sectoral gainer in last week's trade, as the index posted three consecu-

The Centre's curiously timed attempt to 'clarify' foreign direct investment norms for e-commerce players could end up scuttling investor interest in the sector that has attracted large foreign players and generated thousands of jobs. The fresh restrictions and the clarifications on certain operational aspects could reinforce investor complaints about India being unpredictable in terms of policies. In March 2016, foreign investment up to 100% was allowed under the automatic route for e-com firms engaged in business-to-business transactions using the marketplace model — one where a firm sets up an enabling IT platform to facilitate trade between sellers and buyers. However, FDI was not allowed where the e-com player owned the inventory of goods to be sold, or for business-to-consumer purposes, barring a few exceptions. Now, the rules have been altered for players like Amazon or Flipkart (majority-owned by Walmart) that have made significant investments in India. The policy, to kick in from February 1, 2019, could require a major overhaul in the business model and shareholding structures of such players. For instance, earlier a single vendor or its group firms couldn't account for over 25% of sales in a marketplace; now the rules bar sales by any entities where the e-com firm has an equity stake. A vendor's inventory will be deemed to be controlled by the e-com player if more than 25% of its purchases are from the latter or related firms. It's not clear how this change will help meet the principle enunciated in the policy note — fairness and the creation of a non-discriminatory, level playing field.

Separately, any specialised back-end support for some sellers must now be extended to all vendors, while discounts, cash-backs and preferential subscription services have been made far trickier to implement. An e-commerce marketplace entity will not mandate any seller to offer a product exclusively on its platform under the new rules. But this doesn't explain what to do when a seller voluntarily opts to sell exclusively on one e-commerce portal over another. The government is clearly keen to quell the long-brewing disquiet among offline retailers over big discount sales and the surge in e-commerce. Yet, it could have waited for the recommendations of a national e-commerce policy task force set up this April. That task force could trigger more policy shifts. India's retail FDI policy remains muddled — with the debate now focussing on online vs offline trade as opposed to big vs small, or a single brand vs multi-brand retail FDI regime. Globally, India has been taking on protectionism, and this month the Finance Minister said free trade is essential so consumers get the best deal everywhere. The same consumer focus and non-protectionist tenets must be applied for internal trade.

KPI GLOBAL SME IPO BY FIRST FORTNIGHT OF JANUARY 2019

-By Dilip Davda

KP Group is engaged in power and transmitter towers related business. Group has three companies i.e. KP Buildcon Pvt. Ltd. engaged in telecom and power transmission towers, KP Energy Ltd. engaged in Wind Power and KPI Global Infra engaged in Solar Power business. Group's first BSE SME IPO for KP Energy Ltd. came in February 2016 at a price of Rs.70 per share (Rs. 10 FV). It gave 2 for 1 bonus in January 2017 and 3 for 10 in

March 2018. The company migrated to main board in October 2018 and is currently quoting around Rs. 206.70 (as on 24.12.2018). Thus it gave handsome rewards to its investors. Now the group is planning second BSE SME IPO of KPI Global Infrastructure Ltd. Issue is

likely to open in the first half of January 2019 for mobilizing Rs. 40 cr. to part finance its ongoing 25 MW IPP Solar Project. KPI Global is already having 208 acres of land to take care of its ongoing as well as future plans. The company is having two variants for its business

i.e. IPP (Independent Power Producer) and CPP (Captive Power Producer). It is having PPAs with private sector companies like Mafatlal, Best Paper etc. where Discoms are the party to it. KPI Global is the first private sector SME that has received sanction for Rs. 86 crore loans from PFC (Power Finance Corporation) despite third party PPAs. More details about the company and its issue will be shared by first week of January 2019.

WEEKLY MARKET WRAP

tive positive weekly closes. Structurally the index is in a positive zone both in terms of momentum and trend, and one should maintain a positive outlook and look to buy on a dip. Best performing stocks within this are B A N K I N D I A , SYNDIBANK, CANBNK & UNIONBANK, which are extended on the upside at the current price. We prefer to keep a close watch on SBIN, which at the current juncture is on the verge of a breakout on the upside. The psychological level which the stock needs to take out is 300,

above which we expect significantly upside and contribution from this banking heavyweight.

It was a mixed week for the sectoral indices with the REALTY, METALS and AUTO being the largest price losers, down 1.2% to 2.2%. All these three indices are in an intermediate DOWN trend which suggests that selling pressure is likely to creep in every time they try to post a bounce back. At current prices, NIFTYREALT has started to shift into negative momentum, a break below (220-225)

can lead to fresh round of selling for the sector. DLF is the biggest contributor to this sector, and a move above (184-185) is necessary for the stock and the sector to improve. Amongst the others, PRESTIGE looks encouraging and a move above 222 will lead to an ascending triangle breakout.

NIFTYAUTO too has started to shift momentum on the downside, and a move below last week's low of 9058 will lead to further weakness. On the upside, the index needs to break above 9600 for a trend reversal and fresh

buying impetus. Two wheelers & auto ancillaries were the major contributors to last week's losses led by H E R O M O T O C O , MOTHERSUMI & BAJAJAUTO. Few stocks like TATAMOTORS & ASHOKLEY are in an emphatic down trend and yet do not show any sign of bounce back, we suggest an avoid. M&M on the other hand has shown the maximum strength as is the biggest weekly gainer in the sector. The stock is a little extended on the upside and a short-term dip should be looked into a buying opportunity.

Entire technical indicators are coming out from the overbought phase slowly which is positive for long term move. According to chart analysis; Gold and Silver will show 2 to 5 percentage of return from proper level and the accurate boom/bear trade

will provide to our paid and deal members in New Year. MCX gold makes cup and handle inverted pattern on yearly chart which gives signal for staying boom pro move on near support 30673 and 30281 when above target can be seen on 30281 after breaking 30673 and being close below it. Keep in mind \$1310 as near resistance when \$1226 as near support in Comex gold.

MCX silver price was trading in range from 42000 to 35000 with quite volatile trend from the beginning to end of the year. Regular readers know that we have advice for making boom pro trade in MCX silver from the decline when the price was running between 36000 to 37000 similarly; it showed steady improvement above 2500 to 4000 from the given rate. MCX silver makes complex head and soldier top pattern on chart which gives signal for continuing boom on near support 37629 and 36718 when

the below target can be seen up to 36718 after breaking 37629 and being close below it. According to Donchian channel; nearest breakout surface is becoming on 39584 to 40811 in Silver which can be considered as near resistance & little profitable selling can be seen in the surge of below 39584 when upper target can be found on 40811 by crossing resistance and giving close on it. acceptance of China's currency – the Yuan – into the IMF's foreign exchange basket. this move paves the way for the IMF to place the yuan on a par with the US dollar.

This is the latest in a series of global developments that threatens to eliminate the US dollar as the world's reserve currency. This announcement will trigger one of the most profound transfers of wealth in our lifetime. As per Astro Economics For the last 600 years, there have been six different global reserve currencies controlled by world superpowers.

The latest – the US dollar – has dominated world currency for over 80 years. The alarming fact is, global reserve currencies have collapsed every 80-90 years for

the last six centuries! What does this mean for America and the dominance of the US dollar?

As per Astro Economics and Stars the imminent collapse or substitute of US dollar May be seen soon in Year 2019-20. I foresee Currency War Like Situation In 2019-20 Between USA and China. US dollars May face Challenge against Digital Currencies.

Just take a look at the graph of lifespan of dominant currencies going back up to 600 years. Notice that the US dollar has now been the dominant currency for 88 years, about the same length of time as its predecessors. Therefore Stars Indicate US dollar's days as the world's reserve currency are coming to a climactic end.

Nifty was open near 10430 at the beginning of the year then it created the historical and current year high level on 11750 before showing 9940 as low where it again showed up low level near 10000 since heavy sale pro move; recently it is doing consolidation between 10400 to 10900 on the other hand; our regular reader know we had told that nifty will not remain on the highest level with heavy downturn for long time when nifty was trading on all time high level 11700 now the result is in front of you where nifty has registered 1600 points of decline after downturn pro move out in just one and a half months. We had also mentioned below Jackpot target from 10900 to 10200 in nifty when it was running on 11600 where all target are cured and members were earned lots of profit in nifty future and option. The readers who want to see our old recommendation performance in Index future option & stocks future option or want to join in our paid/deal membership they can call us or message on the given number. We had told sales pro move will remain unchanged below 10789 and 11055 in Nifty where it showed low level below 10600 with heavy selling from the resistance when declared 10590 as near support where it outlined high level up to 10880 since improving move with steady short covering from the low of near that surface & given close below it at the end of the week. The improvement of 403 points above has found in nifty with heavy volatile move in annual terms.

Nifty makes Adam-eve-double top pattern on yearly chart which gives signal for remaining profitable selling below near resistance 11180 and 11356 from high when update pro move can be found growing ahead with target 11356 after crossing 11180 and giving close

on it. Entire technical indicators are entering into the oversold phase slowly which is negative for medium to long term move. According to chart pattern, action and volume base analysis; nifty can show 450 to 600 points of sure movement around the crucial level and the accurate recommendation will provide to our paid and deal members. Closer down Bollinger band is opening below 10533 and 10219 in nifty which can be considered as near support when improvement can be seen in the decline of above 10533 with short covering and below level also can be found up to 10219 by breaking 10533 and being close below it. Explanation is made in the media by 63 Moon CBI has been misguided by few brokers and former FMC Chairman

As you all are aware, ODIN has completed 20 years and since its inception has remained market leader enjoying No.1 IP trading terminal product of the world with over 25 lakh licenses. ODIN has created more than 25 lakh jobs and positively impacting livelihood of over 1 crore people.

Certain vested interests and mischief mongers are spreading rumors with the intention to create panic and disquiet among our clients, shareholders, employees and other associates. In view of this, it has become necessary for us to present the facts through mass medium and we came out with an advertisement in leading newspapers and holding this media interaction to discuss several points including the CBI's recent action on MCX related matter:

We seek to table/clarify the following two points in media interaction today...

1. MCX didn't have place of business, the technology, all India presence of business etc., which were the conditions required to comply in the period between final recognition and in-principal

recognition (9 months). A video that was played on the date of inauguration showcased clarifies the reality of having complied with everything required to get final recognition and going live.

2. The Red Herring prospectus, which was filed in SEBI for IPO purpose has all the documents, evidence like date-wise approval, that confirms all the points with proofs.

With regard to the gain made by FTIL:

A parallel cannot be drawn for offloading of MCX shares between private equity (PE) firms and promoter of an exchange. PE firms such as Edelweiss Capital Limited and FID Funds (Mauritius) Ltd. sold the MCX shares of face value of Rs 5 each while FTIL had sold MCX shares at face value of Rs 10. So the comparison and calculation itself is absolutely wrong and is a convenient creation of CBI. While, as a promoter, FTIL had taken a most transparent and scientific process of priced discovery through IPO.

It may be pointed out that there was full process of compliance in case of an IPO which rests in the hands

of SEBI and merchant bankers and not in the hands of FTIL and the Forward Markets Commission (FMC).

There is a need to appreciate and note the contribution made by the MCX towards creation of commodity market in the country in general and in the process generated over a million jobs and created huge value for its stakeholders. A bank that had invested Rs 12 crore reaped Rs 1200 crore in the IPO.

MCX was first among the exchanges to be listed at a time when other exchanges were shying away from coming out with listing. BSE was given extension of one-year and NSE was given two-year extension to meet the demutualization norm. Even the RBI which is the supreme and the oldest regulator had given more than 10-year extension to Kotak and Yes Bank to meet the same criteria.

IPO process is a technical and fair practice method adopted by all regulators for scientific way for dilution of stake. Given this scenario, it is evident that the CBI has been misguided by few brokers and former FMC Chairman.

MARKETS WITNESS FURTHER UPTREND IN COMING WEEK TO WELCOME 2019

MARKET FORECAST FOR THE PERIOD STARTING FROM 31st DECEMBER, 2018 TO 06th JANUARY, 2019

Markets are expected to open on Monday with a positive gap of 40-60 points. Markets are likely to be highly volatile and to witness mixed trends all through the week. FIIs are showing buying interest in the markets with more buying than selling last week also and DIIs are doing more of balanced trades during last week. Markets witness huge volatility during the week and likely to close with gains at the close of the week. Looking at the present conditions, it is wise on the part of investors and traders to exercise utmost caution.

IT, Infrastructure, Banking, cement and energy sectors will do well during this week. Investors and traders are advised to very cautious regarding Pharma stocks and NBFCs for the time being.

I advise all the traders to apply stop loss for all their executed trades as per their risk bearing capacity. Please do take note of the Re-Entry price where ever the stop loss triggers.

POINTS TO REMEMBER:

SAFE BETS : Both the positions are to be taken simultaneously in order to be safe on trading, i.e., both futures as well as option are to be taken to get the proposed served.

OPTIONS SEGMENT: Both call and put are to be taken simultaneously without any deviation. Do not do naked trading, it is dangerous to pockets.
