TYPE OF SYNC

"Download only" sync

"Download only" type of sync doesn't care what happens with your local files, it never puts anything on a server, never deletes anything from it, it only looks for fresh remote files and downloads them.

POLICY ON FILE/FOLDER DELETION

Delete local files

...even if they were edited

These switches determine what happens with remote or local files/folders if their corresponding counterparts would be deleted locally or on a remote server accordingly.

POLICY ON SYNC CONFLICTS

Action

Ask what to do
